

Cybersecurity and Technology Risk Management

Successful IT today is about handling the ongoing challenges of productivity, compliance, security, continuity, and recovery. It's a full effort of both proactive and reactive measures, which can be difficult for businesses to balance.

Rehmann Technology Solutions is here to help. Here's how:

Cybersecurity Review

An assessment of your IT security environment against industry standards, including policies, security, access control, data integrity, continuity plans, and more. You'll better understand your IT landscape and how it can be further strengthened.

Get a comprehensive evaluation of your environment that covers:

- Network and server safeguards
- Device management
- Endpoint protection
- Multifactor authentication
- Log monitoring
- Backups
- Network topology and architecture
- Change and patch management

Vulnerability Assessments and Penetration Testing

Our vulnerability professionals identify security risks associated with your systems. We perform reconnaissance on your environment, scan for vulnerabilities, and simulate actual attacks to help identify potential security weaknesses and secure your environment. We offer the following assessment services:

- External Vulnerability Assessment and Penetration Testing
- Internal Vulnerability Assessment and Penetration Testing
- Wireless Vulnerability Assessment and Penetration Testing
- Web Application Testing

Social Engineering

Is your organization security aware? Know for sure with our multi-faceted social engineering tests. We use email, phone, and in-person efforts to determine your susceptibility to attacks.

Security Awareness Training

Phishing, vishing, smishing, ransomware, and more – is your organization ready? Our training covers the latest IT threats, security, data breaches, identify theft, and most importantly, offers protective measures for your teams to combat them all.

CyberReady

A comprehensive program that simplifies cybersecurity. CyberReady helps build the foundation of a robust, well-rounded security program tailored to your organization.

Rehmann Technology Solutions is Your Trusted Tech Partner

We are a team of specialists dedicated to your IT success. We're unbiased experts who will help fortify your technology systems and procedures. From project consulting to being your IT team, we make technology a powerful asset that moves your organization forward.
